Forecast for Wednesday 01 Nov 2023

Weather: Rain with snow above about 600m will extend to all ranges later in night and early Wednesday. The precipitation will become heavy at times with blizzard conditions over higher ridges and summits, turning to sleet then dying out later in afternoon. A few showers following.

Chance of cloud-free hill tops above 800m: Little chance.

Low Cloud and visibility: Misty conditions with poor visibility in persistent rain and very poor or virtually zero visibility in the heavier snow. Clouds extensive down around 500 to 600m.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Dangerous conditions across the Southwest Highland area, especially over higher ridges and summits.

Forecast for Thursday 02 Nov 2023
Weather: A much improved morning with lighter winds, some sunshine and staying dry. Cloudier in afternoon with outbreaks of rain extending westwards, mostly over the Trossachs, wintry on highest tops. Also strengthening winds.

Maximum wind: Light northeasterly winds in morning, average speeds of 10 to 15mph, increasing 25mph gusts 40mph on the tops by evening.

Chance of cloud-free hill tops above 800m: 80% reducing 40% in east of area later in afternoon.

Low Cloud and visibility: Very good visibility with patches of cloud above 700 to 800m. Visibility will become poor in east later afternoon and evening with clouds becoming extensive above 700m.

Temperature: **Glens:** Minus 1 Celsius rising to plus 8 Celsius.
At 800m: Plus 3 Celsius
Freezing level: 1100m
